

Electric Vehicle Charging Point Installers – Remote Learning

Course Aim

This remote learning course aims to provide the knowledge and understanding of how to install electrical vehicle charging points in compliance with BS 7671, the Electrical Safety Quality and Continuity Regulations and the new IET Code of Practice.

Who Should Attend?

This course is aimed at delegates who have basic knowledge and understanding of electrical installation relating to the latest edition of the Standard, which includes knowledge of circuit design, inspection, testing and certification. This course is aimed at electricians and electrical contracting businesses who are looking to understand the specific requirements relating to Section 722 of BS 7671.

Please note: This is a Virtual Classroom Training Course. The use of compatible devices will be needed to access the training software via a PC, Laptop, Tablet or Smart Phone.

Course Duration

This is a 1 day course.

Certification

Delegates successfully completing the course will receive a NICEIC certificate.

Agenda

- Modes of charging and connection
- Pre-Installation consideration and surveying
- Meeting the requirements of BS 7671:2018 + Amendment No.1:2020 (Section 722)
- Awareness of IET Code of Practice for Electric Vehicle Charging Equipment Installation (4th Edition)
- Commissioning and notification process
- Course assessment
